

Molecular Medicine Seminar

2016

Tuesdays at 9.30 a.m., room no. 211 / A35

SEPTEMBER

06/09/2016	Ivan D'Orso, Ph.D.	Transcriptional Regulatory Networks: New Lessons from HIV and Eukaryotic Cells
20/09/2016	Matous Hrdinka room 145	Non-degradative ubiquitination controls innate immune signalling
27/09/2016	Alexey Davydov (Dmitriy Chudakov's group)	Full length profiling of antibodies repertoires

OCTOBER

04/10/2016	Martin Krzywinski	How to communicate information - clearly and beautifully
11/10/2016	Václav Šeda (Marek Mraz's group)	Crosstalk of microenvironmental interactions and BCR signalling in malignant B cells
25/10/2016	Maria Elena Candella (Mary O'Connell's group)	Pursuit of the endogenous RNA that generates an innate immune response

NOVEMBER

01/11/2016	Milan Hluchý (Dalibor Blazek's group)	Role of Cdk11 in gene expression
------------	---	----------------------------------

08/11/2016	Ann-Kristin Östlund Farrants	TBA
15/11/2016	Kateřina Černá (Marek Mraz's group)	microRNAs involved in DNA damage response in malignant B cells and their biological and clinical relevance
22/11/2016	Jitka Malčíková (Sarka Pospisiova's group)	Clonal evolution in chronic lymphocytic leukemia
29/11/2016	Jitka Mlčochová (Ondrej Slabys group)	Study of microRNAs involved in EGFR signaling pathway in colorectal cancer

DECEMBER

06/12/2016	Angela Gallo	RNA Editing dynamically rewrites the cancer code
13/12/2016	Nikola Tom (Sarka Pospisilova's group)	TOTEM - software for automated NGS pipeline configuration

JANUARY

03/01/2017	Kamila Součková (Ondrej Slabys group)	Annual fish <i>Nothobranchius furzeri</i> - novel vertebrate model for studying renal cell carcinoma
------------	---	--
